

How to Configure VPN on Android?

Configuration Steps

1. Using a computer to export VPN configuration file: Please refer the instructions below, choosing the configuration file you would like to export, click “Export” with the left mouse button and then the configuration file will be downloaded to your computer.

a. Export OpenVPN configuration file (Send All Traffic Over VPN Server) : If the configuration file is added to your smart phone, then it will re-direct all internet traffic of your smart phone to BR-6208AC.

b. Export OpenVPN configuration file (The home-network access is allowed only over VPN server) : If the configuration file is added to your smart phone, then your smart phone will be able to access to local LAN of BR-6208AC, and surf on the internet via router connected by smart phone or 3G/4G.

OpenVPN Server

Enabled VPN Server :
