Multi-Language Quick Installation Guide (QIG) on the CD

Čeština: Českého průvodce rychlou instalací naleznete na přiloženém CD s ovladači.
Deutsch: Finden Sie bitte das deutsche S.A.L. beiliegen in der Treiber CD.
Español: Incluido en el CD el G.R.I. en Español.
Français: Veuillez trouver l’français G.I.R ci-joint dans le CD.
Italiano: Incluso nel CD il Q.I.G. in Italiano.
Magyar: A magyar telepítési útmutató megtalálható a mellékelt CD-n.
Nederlands: De nederlandse Q.I.G. treft u aan op de bijgesloten CD.
Polski: Skrócona instrukcja instalacji w języku polskim znajduje się na załączonej płycie CD.
Русский: Найдите Q.I.G. на русском языке на приложеном CD.
Türkçe: Ürün ile beraber gelen CD içinde Türkçe Hızlı Kurulum Kilavuzu'nu bulabilirsiniz.
Українська: Для швидкого налаштування Вашого пристрою, будь ласка, ознайомтесь з інструкцією на CD.
I. **Product Information**

The EW-7711ULC is a next-gen 11ac 5GHz USB Wi-Fi adapter ideal for upgrading laptop.

*This wireless adapter can be used in addition to your existing wireless adapter(s). For help using the adapter after setup, please refer to III-3. or IV-3 Using The Adapter.*

I-1. **Package Contents**

I-3. **System Requirements**

- Windows XP/Vista/7/8/8.1~, Mac OS X 10.7~
- Minimum USB 2.0 Port
- Hard Disk: 100MB
- CD-ROM Drive
II. Installation

1. Switch on your computer and insert the USB adapter into an available USB port of your computer.

⚠️ *Never use force to insert the USB adapter.*

2. If a Hardware Wizard/Driver Installation window opens as shown below, please click “Cancel” or “Close”.

![Hardware Wizard/Driver Installation window](image)
3. Insert the included CD-ROM into the CD drive of your computer.

   *The setup wizard is also available for download from the Edimax website.*

4. For **Windows** users the setup wizard will open. For **Mac** users the CD’s “Mac” folder will open.

   *If the CD doesn't auto-run, please browse to the “Autorun” or “Mac” folder of the CD for Windows or Mac users respectively.*

5. Please follow the instructions in the appropriate chapter for your operating system.

   **III. Windows**
   **IV. MAC**
III. Windows

III-1. Driver Installation

1. Click the EW-7711ULC wireless USB adapter to continue.

2. Click “Install Driver” to continue to install the drivers for your EW-7711ULC.
3. Please wait while the setup wizard prepares to install the drivers.

4. Click “Next” to continue.
5. Click “Install” to install the driver.

6. Please wait while the driver is installing.
7. When the installation is complete, click “Finish”.

8. Click “Exit” to close the setup wizard.

The multi-language QIG is also included on the CD-ROM. To open it click “Multi-language QIG”.

9. Users can connect to an available Wi-Fi network as usual. For guidance on doing so, please refer to III-3. Using The Adapter.
III-2. Driver Uninstallation

III-2-1. Windows XP/Vista/7

1. Go to Start > Programs > Edimax Wireless LAN > Uninstall.

2. Follow the on screen instructions. An uninstall wizard will guide you through the process.

III-2-2. Windows 8/8.1

1. Right click anywhere on the “Start” screen and then click the “All apps” icon in the bottom right corner.

2. Locate the Edimax Wireless LAN category, select “Uninstall” and follow the on-screen instructions.
III-3. Using The Adapter

After you have installed the driver, Windows users can connect to a Wi-Fi network as usual.

Below is an example of how to connect using Windows Vista - the process may vary slightly for other versions of Windows.

1. Click the network icon (examples below) in the system tray and select “Connect to a network”.

2. Your new wireless adapter will be listed in addition to your existing wireless adapter. In the example below, it is named “Wireless Network Connection 3”. Search for the SSID of your 5GHz Wi-Fi network and then click “Connect”. If you set a password for your network, you will then be prompted to enter it.
3. After correctly entering your password, you will be successfully connected to your Wi-Fi network. You can disconnect the wireless adapter in the same way you usually would for your existing wireless adapter.
IV. Mac

IV-1. Driver Installation

1. Double click the “AC450_USB_Installer.pkg” file.

2. Double click the “AC450_USB-Install.pkg” file to open the driver installation wizard.

3. Click “Continue” to proceed to the next step.
4. Click “Install” to install the driver.

5. You may be prompted to enter your system/administrative password before the installation can begin. Enter your password and click “Install Software”.

6. You will be prompted that you must restart your computer when the installation is complete. Click “Continue Installation” to proceed.
7. Please wait while the driver is installing.

![Image of installation process]

8. When the installation is complete, you will see the following screen informing you that “The installation was successful”. Click “Restart” to restart your computer.

![Image of successful installation message]
9. After your system has restarted, the wireless utility will open automatically as shown below. You can use the wireless utility to connect to a Wi-Fi network with your new adapter.

![Wireless Utility Screenshot]

10. Select a Wi-Fi network from the list and click “Connect”. For more guidance, please refer to IV-3. Using The Adapter.

IV-2. Driver Uninstallation

1. Double click the “AC450_USB_Installer.pkg” file.

2. Double click the “AC450_USB-Uninstall.pkg” file to open the driver uninstallation wizard and follow the instructions on-screen.
IV-3. Using The Adapter

Mac users need to connect to a Wi-Fi network using the included utility software.

IV-3-1. Connect to a Wi-Fi network

1. If the wireless utility software window shown below is not already open, please click the “E” icon in the top right of the screen and select “Open Wireless Utility”.

![Diagram of wireless utility software window]

![Image of wireless utility software window]
2. Select “Site Survey” from the menu across the top of the window, and then select a 5GHz Wi-Fi network from the list and click “Connect”.

3. If you set a password for your network, you will then be prompted to enter it. Enter your password and click “OK”.
4. After correctly entering your password, you will be successfully connected to your Wi-Fi network.
IV-3-2. Wireless Utility

The wireless utility offers features to monitor and configure your connection. Navigate the wireless utility using the menu across the top of the window.

IV-3-2-1. Profile

The “Profile” screen allows you to save different Wi-Fi connection settings as “Profiles”. Existing profiles are listed in the “Profile List”.

<table>
<thead>
<tr>
<th>ADD</th>
<th>Opens a new window to add a new profile.</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDIT</td>
<td>Edit an existing profile.</td>
</tr>
<tr>
<td>DELETE</td>
<td>Delete an existing profile.</td>
</tr>
<tr>
<td>ACTIVATE</td>
<td>Activate (connect to) an existing profile.</td>
</tr>
</tbody>
</table>

**ADD**
When you select “ADD”, a new window will open. Select an SSID from the drop-down menu in the top right corner, or enter a “Profile Name”, then go the “Authentication & Security” tab and enter the Wi-Fi network’s security key/password under “WPA Pre-Shared Key”.

⚠️ *You can also add a new profile from the “Site Survey” screen.*
Power Saving Mode | Select “CAM (Constantly Awake Mode)” or “Power Saving Mode” depending on your preference. In “Power Saving Mode” the device will automatically reduce its power consumption when not being used.

Tx Power | Specify a Tx power level. This adjusts the transmit power of the wireless adapter. A lower level reduces performance but decreases interference in the local network environment.

RTS Threshold | Adjust the RTS threshold value.

Fragment Threshold | Adjust the fragment threshold value.

It is recommended to keep the default values for the other settings on this page. Advanced users can make adjustments if necessary.
IV-3-2-2. Link Status

The “Link Status” page displays information about the current wireless connection.

<table>
<thead>
<tr>
<th>MAC Address</th>
<th>801f0275e5cf</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSID</td>
<td>OBM-AirPort-5G</td>
</tr>
<tr>
<td>BSSID</td>

</tr>
</tbody>
</table>

**RESCAN** | Refresh the list of available wireless networks
**CONNECT** | Connect to a selected wireless network.
**ADD PROFILE** | Use a selected wireless network to create a new profile (see IV-3-2-1. Profile).
IV-3-2-4. Statistics

The “Statistics” page displays transmit and receive statistics about the wireless connection.

--- Transmit Statistics ---
- Frames Transmitted Successfully = 1782
- Frames Transmitted Successfully Without Retry = 226
- Frames Transmitted Successfully After Retry(s) = 1516
- Frames Fail To Receive ACK After All Retries = 9
- RTS Frames Successfully Receive CTS = 0
- RTS Frames Fail To Receive CTS = 0

--- Receive Statistics ---
- Frames Received Successfully = 13923
- Frames Received With CRC Error = 160
- Frames Dropped Due To Out-of-Resource = 0
- Duplicate Frames Received = 0

**RESET COUNTER**
Reset all counters to zero.
IV-3-2-5. WPS

Wi-Fi Protected Setup is a simple, alternative way to establish connections between WPS compatible devices. Some wireless network devices feature a built-in WPS button, which activates WPS on that device. When WPS is activated in the correct manner and at the correct time for two compatible devices, they will automatically connect to each other.

WPS can also be activated via a device’s web user interface, which has the same effect as physically pushing the WPS button (known as PBC or “push button configuration”).

PIN code WPS is an additional variation of WPS which can be activated from a device’s web user interface, and includes the use of a PIN code between the two devices for identification and verification.

The “WPS” page displays information about Wireless Protected Setup (WPS), including a list of available WPS access points and user-defined WPS “Profiles”. Instructions to set up PBC WPS and PIN code WPS are included below, followed by a description of each item on this page:

You can save WPS settings as a profile using the “Export Profile” button and switch between profiles using the “WPS Profile List”.
PBC: Push Button Configuration

The EW-7711ULC does not feature a physical WPS button, but PBC WPS can be executed from this page by following the steps below:

1. Press the WPS button on your **wireless router/access point** for the correct length of time to activate its WPS.

   *Please check the instructions for your wireless device for how long you need to hold down its WPS button to activate WPS.*

2. **Within two minutes**, click the “PBC” button in the bottom left of the “WPS” page. The wireless adapter will establish a connection with your wireless router/access point.
PIN Code WPS

PIN code WPS includes the additional use of a PIN code between devices. This is useful for identification and verification purposes in crowded wireless environments with multiple routers/access points/wireless devices.

1. The wireless adapter’s PIN code is listed on the right side of the “WPS” page under “Pin Code”. Go to your wireless router/access point’s web user interface and input the wireless adapter’s PIN code in the correct location, and activate PIN code WPS for your wireless router/adapter.

   Please check the instructions for your wireless router/access point for how to access the web user interface and where to input the PIN code.

2. Within two minutes, select your wireless/router/access point from the “WPS AP” list as shown below, and then click the “PIN” button in the bottom left of the “WPS” page. The wireless adapter will establish a connection with your wireless router/access point.
Below is a description of all the items on the “WPS” page:

<table>
<thead>
<tr>
<th>Rescan</th>
<th>Refresh the list of available wireless networks.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Information</td>
<td>Display more information about the selected wireless network.</td>

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio technician for help.

FCC Caution
This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the authority to operate equipment.

Federal Communications Commission (FCC) Radiation Exposure Statement
This equipment complies with FCC radiation exposure set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 2.5cm (1 inch) during normal operation.

Federal Communications Commission (FCC) RF Exposure Requirements
This EUT is compliance with SAR for general population/uncontrolled exposure limits in ANSI/IEEE C95.1-1999 and had been tested in accordance with the measurement methods and procedures specified in OET Bulletin 65 Supplement C. The equipment version marketed in US is restricted to usage of the channels 1-11 only. This equipment is restricted to indoor use when operated in the 5.15 to 5.25 GHz frequency range.

R&TTE Compliance Statement

Safety
This equipment is designed with the utmost care for the safety of those who install and use it. However, special attention must be paid to the dangers of electric shock and static electricity when working with electrical equipment. All guidelines of this and of the computer manufacture must therefore be allowed at all times to ensure the safe use of the equipment.

EU Countries Intended for Use
The ETSI version of this device is intended for home and office use in Austria, Belgium, Bulgaria, Cyprus, Czech, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Turkey, and United Kingdom. The ETSI version of this device is also authorized for use in EFTA member states: Iceland, Liechtenstein, Norway, and Switzerland.

EU Countries Not Intended for Use
None.
EU Declaration of Conformity

English: This equipment is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC, 2009/125/EC.

Français: Cet équipement est conforme aux exigences essentielles et autres dispositions de la directive 1999/5/CE, 2009/125/CE.

Čeština: Toto zařízení je v souladu se základními požadavky a ostatními příslušnými ustanoveními směrnic 1999/5/ES, 2009/125/ES.

Polski: Urządzenie jest zgodne z ogólnymi wymaganiami oraz szczególnymi warunkami określonymi Dyrektywą UE 1999/5/EC, 2009/125/EC.

Русский: Это оборудование соответствует основным требованиями и положениям Директивы 1999/5/EC, 2009/125/EC.

Українська: Обладнання відповідає вимогам і умовам директиви 1999/5/ЄC, 2009/125/ЄC.

Slovenčina: Toto zariadenie spĺňa základné požiadavky a ďalšie príslušné ustanovenia smernic 1999/5/ES, 2009/125/ES.

Deutsch: Dieses Gerät erfüllt die Voraussetzungen gemäß der Richtlinien 1999/5/EC, 2009/125/EC.

Español: El presente equipo cumple los requisitos esenciales de la Directiva 1999/5/EC, 2009/125/EC.

Italiano: Questo apparecchio è conforme ai requisiti essenziali e alle altre disposizioni applicabili della Direttiva 1999/5/CE, 2009/125/CE.

Nederlands: Dit apparaat voldoet aan de essentiële eisen en andere van toepassing zijnde bepalingen van richtlijn 1999/5/EC, 2009/125/EC.

Português: Este equipamento cumpre os requisitos essenciais da Directiva 1999/5/EC, 2009/125/EC.

Norsk: Dette utstyret er i samsvar med de viktigste kravene og andre relevante regler i Direktiv 1999/5/EC, 2009/125/EC.

Svenska: Denna utrustning är i överensstämmelse med de väsentliga kraven och övriga relevanta bestämmelser i direktiv 1999/5/EG, 2009/125/EG.

Датч: Dette udstyr er i overensstemmelse med de væsentligste krav og andre relevante forordninger i direktiv 1999/5/EC, 2009/125/EC.

WEEE Directive & Product Disposal

At the end of its serviceable life, this product should not be treated as household or general waste. It should be handed over to the applicable collection point for the recycling of electrical and electronic equipment, or returned to the supplier for disposal.
Declaration of Conformity

We, Edimax Technology Co., Ltd., declare under our sole responsibility, that the equipment described below complies with the requirements of the European R&TTE directives.

**Equipment:** AC450 Wi-Fi USB Adapter – 11ac Upgrade for Laptop

**Model No.:** EW-7711ULC

The following European standards for essential requirements have been followed:

**Directives 1999/5/EC**
