Background

Since Edimax's establishment in 1986, we have grown to become one of the world's leading manufacturers of advanced network communication products. We are dedicated to the design, development, manufacture, and marketing of a broad range of networking solutions. Our success is based on a positive corporate image and the continuous expansion of our partner channel networks. The company's core values include quality service, professional R&D, and innovation. Edimax is headquartered in Taiwan (Republic of China) and has been listed on the Taiwan Stock Exchange since 2001. In 2003, Edimax received ISO 9001 and ISO 14000 certification.

Worldwide Offices

Edimax's global presence spans across North America, Asia, Africa and Europe. The company has branch offices in California, the Netherlands, the United Kingdom, Poland, Romania, France, Germany, Australia, India, Ukraine, UAE, Russia, Italy, Spain, China, Singapore, and Hong Kong. Edimax currently serves over 70 countries via our worldwide distribution channels. Thanks to our international distribution centers and offices, we are able to offer timely logistics, services, and support to customers around the globe. Edimax maintains a customer-oriented approach, and thus spares no effort in fulfilling their local and global networking needs.

Research & Development

Edimax's Taiwan- and China-based R&D team consists of over 200 members. Our solid and professional engineering team has contributed greatly to our success by developing new products to meet the market's ever-changing demands. We are constantly increasing investment in our R&D centers, to strengthen our ability to develop world-class products and solutions. Edimax products are all CE, FCC, and C-Tick emission certified. Our wireless 802.11n and 802.11ac range is Wi-Fi certified, and our drivers are tested by Microsoft and NSTL to ensure interoperability. Edimax has also formed strategic partnerships with several chipset vendors, and is an active member of both the Wi-Fi Alliance and the Gigabit Ethernet Alliance.

Networking People Together

Our mission is simple and clear: "Networking People Together." With over 28 years of experience in the networking industry, we are able to deliver the best solutions to our global partners and customers. We are committed to bringing the latest networking technologies to the customer at the most affordable prices. Not only do we manufacture products for the SOHO and SME markets, but also enable our channel partners to provide complete networking solutions for large businesses. Our long-term business strategies and innovations have allowed our company to consolidate its status as a renowned value-adding and customer-oriented manufacturer in the networking industry.

Product Range

Edimax's wide and comprehensive product lines can satisfy the connectivity needs of any networking architecture or application. Our products are distinguished by their value, performance, and excellent support. The complete range of our products includes wireless solutions, print servers, xDSL routers, Ethernet switches, PoE solutions, powerline solutions, network access controllers, load balancer solutions, network cameras, professional surveillance cameras, KVM switches, media converters, and other customer-oriented networking applications.

28 Years of Networking Experience

With vast experience and deep expertise in network communications, Edimax has been committed to quality service, professional R&D and innovation since 1986.

Hardware and Software Capability

Edimax's expert engineering teams along with our continued investment in R&D deliver high-value, technologically advanced hardware and software.

Regional Channels

National support teams consisting of regional sales managers, sales teams, engineers and technical service personnel understand local markets and are available for assistance 24/7.

Worldwide Services

Edimax has branch offices in 14 countries and serves over 70 countries via worldwide distribution channels. Our global presence ensures we can always offer the highest levels of customer service, support and logistics.

Manufacturing

Our state-of-the-art manufacturing facilities are located in Dong-Guan, China and Taoyuan, Taiwan. As the main production facility, the Dong-Guan Plant spans 30,000 m² and features six SMT lines along with world-class technology.

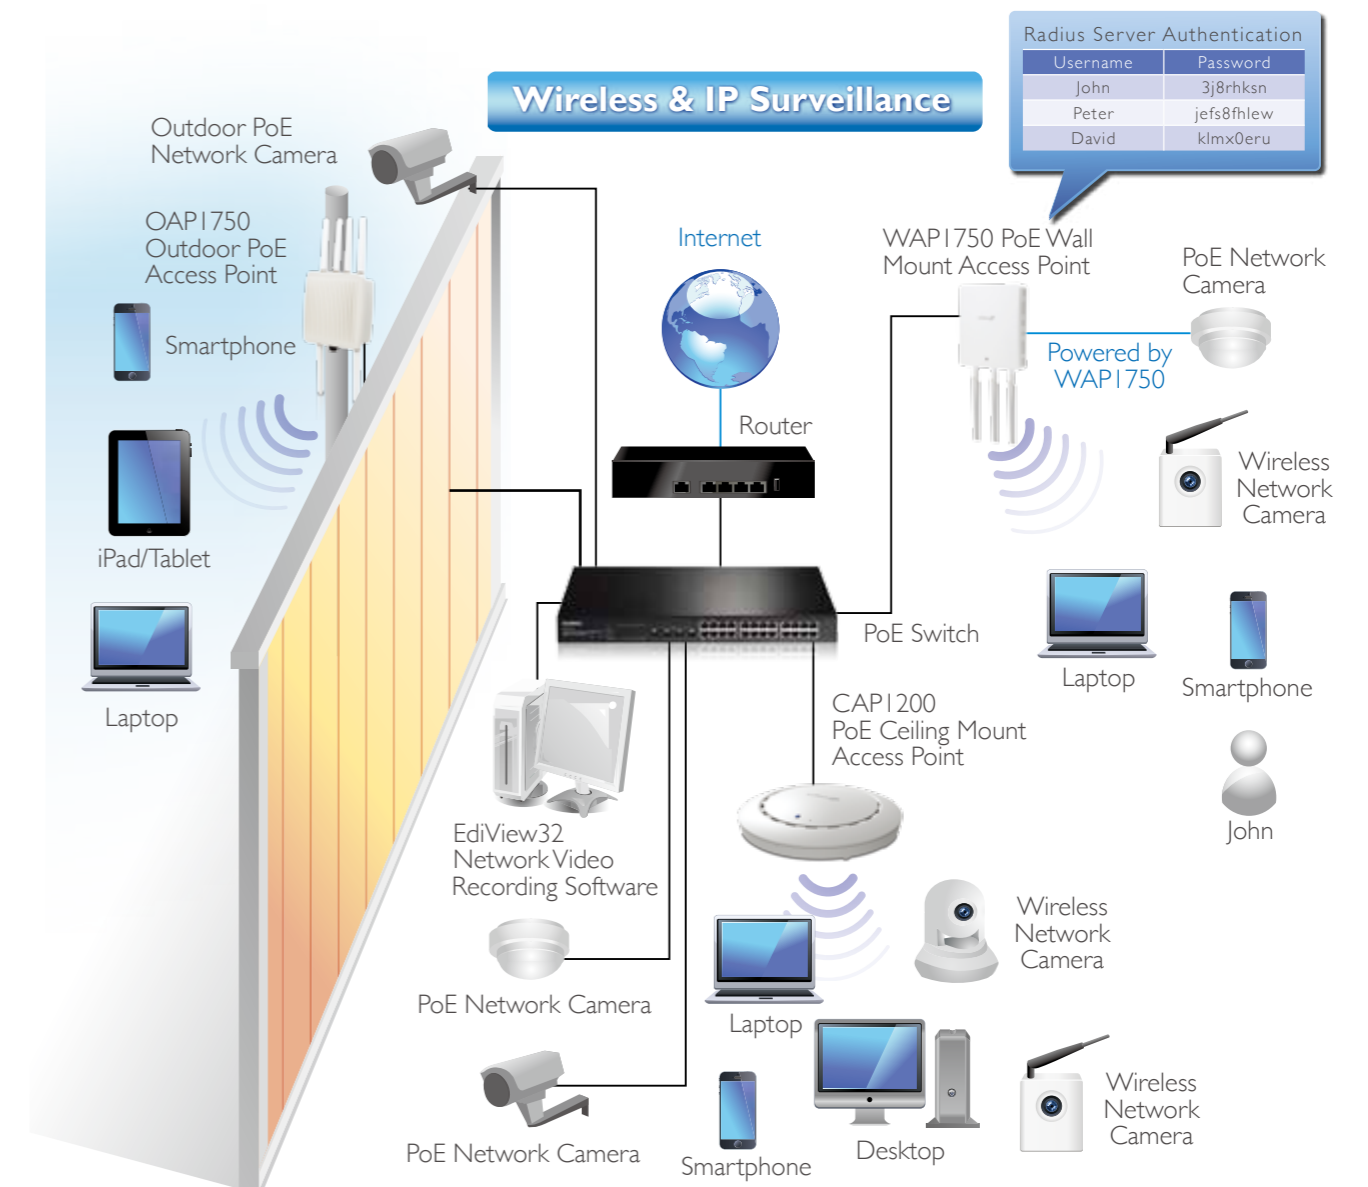

ISP Collaboration

Edimax has developed extensive experience working to integrate solutions with and meet the requirements of ISPs.

Network Solutions for Small and Medium Business

The Edimax small and medium-sized business solution range offers reliability, high-performance and value. For small businesses such as internet cafes or campuses, the Edimax range of PoE switches, recording software, access points and network cameras provides the performance and efficiency which modern network security systems demand.

- Edimax web smart switches feature an innovative power budget UI which allows IT managers to monitor the power consumption of each PoE port as well as the total power consumption of all devices connected. The power budget UI also features a remote on/off function for each PoE port for IT managers to quickly reset the PoE device remotely when one PoE device hangs.
- Edimax's broad, extensive and consistent range of high-quality network cameras ensures we can meet the wide-ranging, critical security requirements of any small to medium-sized business. Advanced video analytic features such as motion detection, alarm, email alerts, and motion-triggered recording offer the highest standard of security. In addition, iOS and Android apps enable 24/7 remote monitoring with a smartphone or tablet at any time or any place - ensuring a versatile, flexible and comprehensive security solution.
- With massive power output, the Edimax N300 high power, ceiling-mounted access point provides a colossal Wi-Fi range of up to 10,000 square meters – ideal for vast environments such as airports, hotels, schools or warehouses.

Network Solutions for Retail Stores

Ensure the highest standard of security at retail outlets and improve profitability with Edimax retail network solutions. Introducing network video surveillance into retail stores can improve loss prevention, store optimization, fraud detection, customer service and security, enabling retailers to achieve new levels of operational excellence.

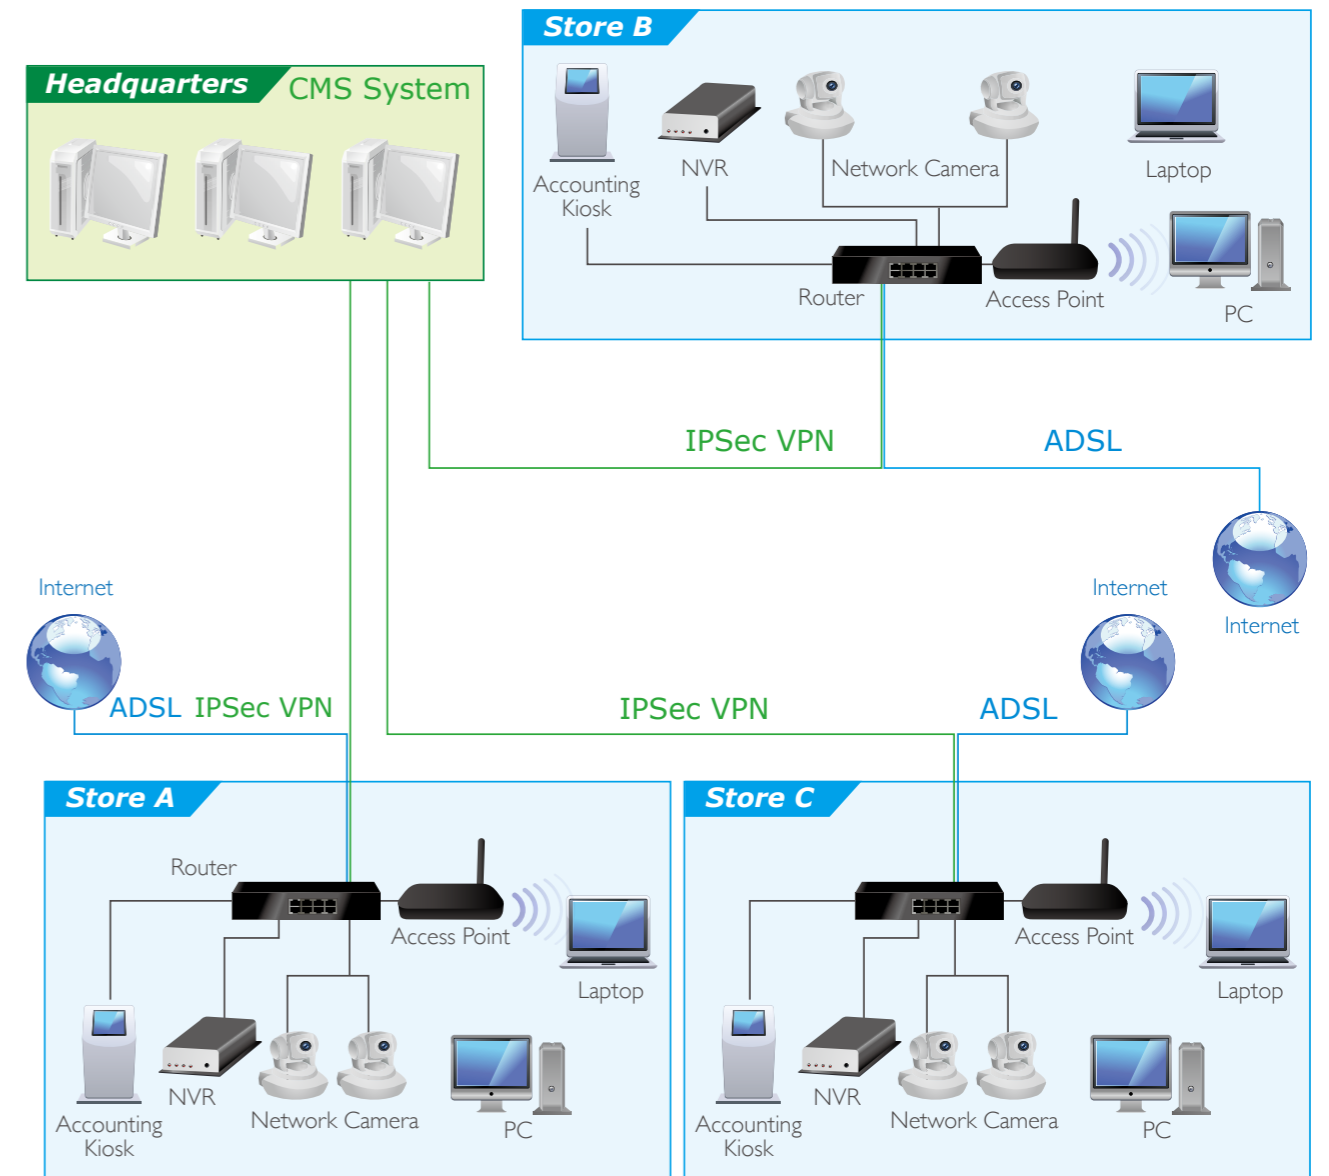

- Edimax offers a broad and consistent range of high-quality network cameras; our extensive selection ensures the essential requirements of any retail store can be fulfilled. Advanced video analytic features such as motion detection, alarm, email alerts, and motion-detection triggered recording offer the highest standard of security. In addition, iOS and Android apps enable 24/7 remote monitoring with a smartphone or tablet at anytime, anywhere - ensuring a versatile, flexible and comprehensive security solution.

The power budget UI also features a remote on/off function for each PoE port for IT managers to quickly reset the PoE device remotely when one PoE device hangs.

Network Solutions for Chain Stores

Edimax chain store network solutions can increase profitability for retail chains, improving security and significantly reducing shrinkage. The introduction of network video surveillance across retail outlets will improve loss prevention, store optimization, fraud detection, security and customer service - driving retail chains towards operational excellence across their range of outlets.

Features

- Wireless 802.11b/g/n standards with Wi-Fi speeds of up to 300Mbps.
- Features EZmax multi-language setup wizard.
- Supports point-to-point and point-to-multipoint bridge.
- Supports WDS mode, universal repeater mode, and AP client mode.
- Features a hardware WPS (Wi-Fi Protected Setup) button.
- Support multiple SSID, MAC Access Control.
- Support Radius server setting for user-based authentication and wireless client control.
- Detachable antenna for wide wireless coverage.

*subject to local regulation

Features

- Complies with wireless 802.11b/g/n standards with Wi-Fi speeds of up to 300Mbps.
- 600mW high power output for superior wireless performance*
- Supports IEEE 802.3af PoE and alternative external power adapter.
- Enhanced wireless coverage up to 10,000 square meters**
- iQ Setup for automatic and smart setup.
- Compact design with flexible mounting and power supply options.
- Multiple operation modes including AP,WDS Point to Point, WDS Point to multiple points, and repeater.
- Up to 5 SSIDs, making it possible to divide clients into different wireless groups with different wireless security settings.
- Scheduling to turn LED and wireless on and off, to reduce power consumption.
- Suitable for home, SOHO, and SMB environments.

* Power is limited up to 20dBm in Europe due to CE regulations

** Wireless coverage is based on independent test results. Actual coverage may vary due to environmental factors such as wireless interference, building materials, and other obstructions

Features

- Complies with IEEE 802.3, 802.3u, 802.3ab, 802.3x, 802.3af and 802.3at standards.
- Supplies 48V DC with 30W output per port (80W total power budget).
- Auto detects power devices (PD) and power consumption levels.
- Supports auto fault detection (over/under current & voltage).
- Supports IEEE 802.3az Energy Efficient Ethernet.
- Fanless design without noise.

ET-913 SFP V2

10/100/1000BASE-T to 1000BASE-SX/LX SFP Media Converter

- Complies with IEEE 802.3ab and 802.3z Gigabit Ethernet standards.
- One 10/100/1000BASE-T gigabit Ethernet TP port and one SFP slot for gigabit link.
- One SFP slot for multi- or single-mode SFP modules.
- Full duplex, auto-MDI/MDIX, and auto-negotiation support.
- Supports link fault pass-through.

The SFP module is not included

ET-940MCR/ET-950MCR

16-Slot Media Converter Chassis with Redundant Power Supply

- Supports up to 16 media converters.
- Supports 19-inch standard rack-mounts.
- Supports Fast Ethernet, gigabit Ethernet, single-mode, multi-mode fiber media converters.
- Supports hot-swappable media converters and power supplies.
- Two redundant power supplies with two cooling fans*
- Power isolation design to ensure each bay is electrically isolated from others.
- Cost-effective and easy installation.

* For the ET-950MCR only. An optional power supply (ET-940PS) is available for the ET-940MCR.

SFP/Mini GBIC

Mini-GBIC/Small Form-Factor Pluggable (SFP) Transceiver

- Complies with IEEE 802.3z gigabit Ethernet and fiber channel standards.
- Industry standard SFP package.
- Single 3.3V power supply.
- Simplex/duplex LC connector with up to 1.25Gbps bi-directional data links.
- Die-cast metal housing for low EMI.
- Hot-pluggable.
- Class 1 laser product in compliance with EN 60825-1.

GP-101SF

Gigabit PoE Splitter with Adjustable 5V DC, 9V DC or 12V DC Output

- Complies with IEEE 802.3af (Power over Ethernet) and IEEE 802.3/802.3u/802.3ab 10/100/1000Base-TX (Gigabit Ethernet).
- Supports standard 802.3af PoE and proprietary PoE such as PoE injectors.
- Splits a networked PoE connection into separate power and Gigabit data connections.
- Allows for non-PoE device installation in remote locations where power is unavailable.
- Adjustable slide switch for either 5V DC, 9V DC or 12V DC output power.
- PoE short circuit protection short circuit protection to safeguard network device.
- Deliver power and data to PoE splitter from up to 100 meters (328 feet) over a single Ethernet cable.
- Reduces installation and equipment costs.
- Easy Plug and Play desktop or wall-mounted installation.

NEW

EK-PA2C

2-Port USB to PS/2 KVM Switch with Cables

- Supports video resolutions up to 1920 x 1440 @ 250MHz.
- Switches automatically between computers with autoscans support.
- 2 built-in combo cables.
- Supports DOS, Win3.X, Win 95/98/98 SE/ME/XP/2000/NT/Vista/7, Netware, Unix, and Linux.
- No software or external power required.

EK-PSK2 / EK-PSK4

2/4-Port PS/2 KVM Switch with Cables

- Supports video resolutions up to 2048 x 1536 @ 350MHz.
