

Life Defined by You

2014 Smart Life Solution Guide

Edimax Smart Life

Edimax Smart Life products introduce a new, unique vision of smart home technology where people are connected to the things they use every day, and where a future of technologically-advanced, Wi-Fi powered homes becomes a reality. The next-generation of smart home technology, Edimax Smart Life products unlock endless possibilities for connected environments and give users intelligent control over their electronics. Smart Life products are modular and work seamlessly together to transform homes step-by-step into dynamic, connected environments of the future that work better for modern lifestyles.

Intelligent, Secure

Smart Life products are intelligent and intuitive. Control your electrical appliances from your smartphone with smart plug switches, and set up scheduling for things you regularly use. Together with motion-detection network cameras, you can trigger the lights or TV to come on when you enter a room, or your coffee machine to switch on first thing in the morning. It's like your home has an intelligent life of its own. And with network cameras watching 24 hours a day, you can always be assured that everything is safe and sound.

Remote, Helpful, Comfortable

You can check and control your Smart Life products from anywhere using Edimax's user friendly smartphone app, so no matter where you are, you're still connected to your home. Schedule or trigger almost anything you want, making life more comfortable in ways that work for you. And Edimax Smart Life products are designed to be extra helpful, with email notifications and a dedicated smart plug power meter to track energy usage and provide vital information to help you live a more energy-efficient life.

Network Cameras

Edimax network cameras bring security and connectivity to your home. Packed with premium features, our wide range of cameras offer reliable, high-quality surveillance to suit any lifestyle and feature stylish, durable designs. Providing reassurance and peace-of-mind that your home is safe and secure, along with genuinely practical uses to check up on kids, family or pets from anywhere in the world - your network camera's audio and motion detection functions also become powerful tools to trigger smart plug switch actions, opening a whole new world of possibilities to build smart, secure homes.

Smart Plugs

Control, schedule and monitor electrical appliances around your home and experience new levels of comfort and efficiency. Our smart plug power meter tracks power usage and helps to cut electricity costs, while smart plug switches allow you to set up intelligent schedules for your appliances and keep your day-to-day life running smoothly, as well as switch appliances on/off remotely with the free iOS & Android smartphone app. You'll never worry that you forgot to leave something on again. And working together with Edimax network cameras, you can set up audio or motion-detection triggers to truly give your home a smart life of its own.

2-Way Audio

Our network cameras feature two-way audio so you can communicate at the camera's location. Don't just see what's going on in your home, hear it as well – and communicate back if you need.

IC-3110P

IC-7001W
Wireless Day & Night PT Network Camera

PIR Motion Detection

Passive infrared (PIR) sensors detect motion via changes in infrared radiation, so your network camera will never let anything sneak by unnoticed. Snapshots or video footage can be taken automatically and saved to an SD card or sent by email or FTP.

Event Alerts

Edimax network cameras keep you informed about what's going on. Audio or motion detection works with email and push notifications, so you're always alerted when something happens you need to know about.

Power Management

A built-in power meter tracks energy usage and displays practical metrics via the EdiPlug app, helping you learn about your home's electricity consumption patterns so you can lead a more energy-efficient life and save on your electricity bills.

Schedule and Switch

The smart plug switch function means you can remotely switch appliances on and off using the free iOS & Android app. That's anytime and anywhere. And intelligent scheduling allows you to set and manage custom schedules for your appliances according to your own unique routine.

Motion Detection On/Off

Coming soon

The motion detection function built into our network cameras can work together with Edimax smart plugs to trigger your appliances on or off. This opens a world of possibilities to automate appliances around your home.

Audio Detection On/Off

Coming soon

Edimax network cameras feature audio detection too, and can trigger your appliances on or off using Edimax smart plugs. This gives you more security and flexibility than motion detection alone – catching audio that occurs off screen.
