How to find the IP address of my computer?

Author: Longcent

This FAQ is applied to the below operation systems:
- Windows 98 / Windows Me
- Windows 2000/XP

Windows 98, and Windows ME

Step. 1 Click on **Start**, then click on **Run**.

Step. 2 The Run Dialogue Box will appear. Type **winpcfg** in the window as shows in the below figure and then click **OK**.

Step. 3 The **IP Configuration** window will appear, displaying your **Ethernet Adapter Information**.

- Select your adapter from the drop down menu.
- If you do not see your adapter in the drop down menu, your adapter is not properly installed.
**Step. 4** After selecting your adapter, it will display your IP address, subnet mask, and default gateway.

**Step. 5** Click **OK** to close the IP Configuration window.

**Windows 2000 and Windows XP**

**Step. 1** Click on **Start** and select **Run**.

**Step. 2** Type **cmd** then click **OK**.

**Step. 3** From the Command Prompt, enter **ipconfig**. It will return your IP address, subnet mask, and default gateway.

**Step. 4** Type **exit** to close the command prompt.
