I-3. System Requirements

- Windows 2000/XP/Vista/7/8, Mac OS X 10.4 – 10.8, Linux
- USB 2.0 Port
- Hard Disk: 100MB
- CD-ROM Drive
I-4. Safety
In order to ensure the safe operation of the device and its users, please read and act in accordance with the following safety instructions.

1. The wireless adapter is designed for indoor use only; do not place the wireless adapter outdoors.

2. Do not place the wireless adapter in or near hot/humid places, such as a kitchen or bathroom.

3. Do not pull any connected cable with force; carefully disconnect it from the wireless adapter.

4. The wireless adapter contains small parts that are a danger to small children under 3 years old. Please keep the wireless adapter out of reach of children.

5. Do not place the wireless adapter on paper, cloth, or other flammable materials. The wireless adapter will become hot during use.

6. There are no user-serviceable parts inside the wireless adapter. If you experience problems with the wireless adapter, please contact your dealer of purchase and ask for help.

7. The wireless adapter is an electrical device and as such, if it becomes wet for any reason, stop using it immediately. Contact an experienced electrical technician for further help.

8. If you smell burning or see smoke coming from the wireless adapter then unplug the adapter immediately, as far as it is safely possible to do so. Call your dealer of purchase for help.
II. Installation

1. Switch on your computer and insert the USB adapter into an available USB port of your computer.

   Never use force to insert the USB adapter.

2. If a Hardware Wizard/Driver Installation window opens as shown to the left, please click “Cancel” or “Close”.

   ![Hardware Wizard/Driver Installation Window](image)
3. Insert the included CD-ROM into the CD drive of your computer. Browse to the contents of the CD-ROM and open the “EW-7811UTC” folder.

4. **Windows** users open the “Autorun” folder; **Mac** users open the “Mac” folder, and then follow the instructions appropriate for your operating system in the following chapters. Linux drivers are also included in the “Linux” folder.

**III. Windows**

**IV. Mac**

**V. Linux**
III. Windows

III-1. Driver Installation

1. Locate and double click the “Autorun.exe” icon to start the driver installation wizard. The Setup Wizard supports Windows XP, Vista, 7 & 8.

2. Click the EW-7811UTC wireless USB adapter to continue.

3. Click “Install Driver” to continue to install the drivers for your EW-7811UTC.
4. For Windows 7 & 8 users, if a “User Account Control” window opens, please select “Yes” to allow the wizard to make changes to your computer.

5. Please wait until the installation wizard is ready and then click “Next” to continue.

6. The installation wizard will install the necessary drivers, please wait.
7. Before you can use the wireless adapter, you need to restart your computer. When the installation is complete you will be asked to choose whether you wish to restart your computer now or later. Click “Finish” to continue.

8. After you restart your computer, your EW-7811UTC will be installed and fully functional. Please disable any other wireless adapters as described in VI. Disabling Network Adapters. Then, Windows users can connect to an available Wi-Fi network as usual. For guidance on doing so, please refer to VII. Using The Adapter.
III-2. Driver Uninstallation

III-2-1. Windows XP/Vista/7

1. Go to Start > Programs > Edimax Wireless LAN > Uninstall

![Uninstall button]

2. Follow the on screen instructions. An uninstall wizard will guide you through the process.

III-2-2. Windows 8

1. Right click anywhere on the “Start” screen and then click the “All apps” icon in the bottom right corner.

![All apps icon]

2. Locate the Edimax Wireless LAN category, select “Uninstall” and follow the on-screen instructions.

![Uninstall button]
IV. Mac OS

IV-1. Driver Installation

Ensure you select the correct folder for your version of Mac OS. To check your version of Mac OS, click the Apple logo in the top left corner of your desktop and go to “About This Mac”.

1. Open the “Wlan_11ac_USB...” folder for your version of Mac OS X (10.4 - 10.8) and double click the “Installer.pkg” file to open the driver installation wizard.

2. Click “Continue” to proceed to the next step.

3. The next screen displays important information, please read it carefully (after the driver is installed, you need to enable the wireless adapter in “System Preferences → Network”. You can click “Print” or “Save” to print/save this information if you need, or the instructions are repeated in Step. 13) Click “Continue” when you are ready to continue.
If you have already have an older version of the software installed on your computer, please uninstall it before you continue.

4. Select a language (the default language is English) and click “Continue” to install the driver.

5. To read the software license click “Read License” and then click “Agree” to confirm you agree to the terms. You must agree to the terms to continue installing the software.
6. If prompted, select which user to install the software for and click “Continue”.

7. Click “Install” to install the driver.
8. You may be prompted to enter your system/administrative password before the installation can begin. Enter your password and click “Install Software”.

![Installer is trying to install new software. Type your password to allow this.]

9. You will be prompted that you must restart your computer when the installation is complete. Click “Continue Installation” to proceed.

![When this software finishes installing, you must restart your computer. Are you sure you want to install the software now?]

10. Please wait while the driver is installing.

![Optimizing system for installed software...]

Install time remaining: About 5 minutes
11. When the installation is complete, you will see the following screen informing you that “The installation was successful”. Click “Restart” to restart your computer.

![The installation was successful.](image)

12. When the adapter is connected to your computer (after your system has restarted) the wireless utility will open automatically. However if you see the notice below then you need to activate the adapter in “System Preferences → Network” as mentioned previously in **IV-1. Driver Installation** Step 3.

   *If the utility doesn’t open, you can open it from the “Applications” menu in your Mac.*

![NOTICE](image)

13. Go to “System Preferences → Network” and a pop up window will display that a new interface has been detected. Click “OK” to close the window and then click “Apply” in the bottom right corner of the “Network” panel.
14. Next, please disable any other wireless adapters as described in VI. Disabling Network Adapters. Then Mac users can connect to a Wi-Fi network using the included utility software. For guidance on doing so, please refer to VII. Using The Adapter.

IV-2. Driver Uninstallation

Ensure you select the correct folder for your version of Mac OS. To check your version of Mac OS, click the Apple logo in the top left corner of your desktop and go to “About This Mac”.

1. Open the “Wlan_11ac_USB…” folder for your version of Mac OS X (10.4 - 10.8).

![Folder icons]

2. Double click the “Uninstall.command” file and follow the on-screen instructions.
V. Linux

The following instructions are an example of Linux setup using Ubuntu 12.04. The process may vary according to your operating system.

V-1. Driver Installation

An active Internet connection is required for Linux driver installation.

1. Ensure that your computer is connected to the Internet.

2. Click on “Dash Home” and then type “terminal”. Click the “terminal” icon.

3. Execute the command below to download the packet which is necessary to build the driver.
   
   **sudo apt-get install build-essential**

   Type the password for the administrator, and then type “y” to install the gcc packet.

4. Change to the “Home” directory and type the command below (where “test” is your login username):
   
   **cd /home/test**
5. Extract the driver using the command below:
   
   ```
tar vxf 2011_0427_RT3572_Linux_STA_v.2.5.0.0.DP.bz2
   ```
   
6. Check the extracted file with the command “ls”:
   
   ![Command output]

7. Change to the driver folder and execute the command below:
   
   ```
cd rtl8812AU_8821AU_linux_v4.2.0_6952.20130315
   ```

8. Build the driver. Execute the command below and then input the password.
   
   ```
sudo make
   ```

9. Execute the command below to load the driver.
   
   ```
sudo insmod os/linux/rt3572sta.ko
   ```

10. Plug the EW-7811UTC into your computer and restart Ubuntu.
11. When Ubuntu has restarted, click on “Dash Home” and then type “network”. Click on the “network” icon as below.

12. Click on “Wireless” and then click the icon to open the drop-down menu labeled “Network Name”. Select the network you wish to connect to and enter the necessary security information.
13. Click on “Wireless” and then click the icon to open the drop-down menu labeled “Network Name”. Select the network you wish to connect to and enter the necessary security information.

![Network settings](image)

V-2. Driver Uninstallation

1. Click on “Dash Home” and then type “terminal”. Click the “terminal” icon.

![Terminal](image)

2. Switch to the directory:
   ```
   cd /home/test/rtl8812AU_8821AU_linux_v4.2.0_6952.20130315/
   ```

3. Execute the following command to uninstall the driver:
   ```
   sudo make clean
   ```
VI. Disabling Network Adapters

To ensure that your USB wireless adapter can function correctly, it is recommended that you disable any other existing wireless network adapters installed on your computer. If you are unsure how to do so, you can refer to the user manual for your computer, or follow the guidance below.

VI-1. Windows XP
Go to Start > Control Panel > Network Connections. Right click your wireless adapter and then select “Disable”.

VI-2. Windows Vista
Go to Start > Control Panel. Click View network status and tasks > View Status and click Disable.
VI-3. Windows 7
Go to Start > Control Panel. Click View network status and tasks > Wireless Network Connection and click Disable.

VI-4. Windows 8
1. Switch to desktop mode by clicking your cursor in the bottom left of the Windows 8 Start screen. Then go to File Explorer > (right click) Network > Properties > Change adapter settings.
2. Right click your wireless adapter, select “Properties” and then “Disable”.

VI-5. Mac

1. Select “System Preferences” from the dock.

2. In “System Preferences”, select “Network”.

3. All of your network connections will be displayed, as shown below. Select “Wi-Fi” from the left panel.

4. Click “Turn Wi-Fi Off” in the main panel.
VII. Using The Adapter

After you have installed the driver and if necessary disabled other wireless adapters (see VI. Disabling Network Adapters), Windows users can connect to a Wi-Fi network as usual (see below). Mac users need to connect to a Wi-Fi network using the included utility software, as described in VI-5. Mac.

VII-1. Windows
Below is an example of how to connect using Windows Vista - the process may vary slightly for other versions of Windows.

1. Click the network icon (examples below) in the system tray and select “Connect to a network”.

![Network Icon Example](image)

2. Search for the SSID of your Wi-Fi network and then click “Connect”. If you set a password for your network, you will then be prompted to enter it.

![Connect to Network Window](image)

3. After correctly entering your password, you will be successfully connected to your Wi-Fi network.
VII-2. Mac: Connect to a Wi-Fi network

1. The wireless utility will open automatically when the adapter is connected to your computer.

   *If the utility doesn’t open, you can open it from the “Applications” menu in your Mac.*

2. Click the “Available Network” tab in the wireless utility. Select a Wi-Fi network to connect to and click “Connect”.

![Connect to a network](image)
3. Enter the password (network key) for the Wi-Fi network, confirm the password (network key) again below and click “OK”.

4. After entering your password, you will be successfully connected to your Wi-Fi network. A summary of the connection will be displayed on the “Link Status” page, as shown below.

The wireless utility offers features to monitor and configure your connection. Navigate the wireless utility using the menu across the top of the window.

VII-3-1. Link Status

The “Link Status” page displays information about the current wireless connection.

The “Link Status” page displays information about the current wireless connection.

<table>

Turn Radio OFF | Switch off the adapter’s wireless radio.

VII-3-2. Profiles

The “Profile” screen allows you to save different Wi-Fi connection settings as “Profiles”. Existing profiles are listed in the “Profile List”.

Add | Opens a new window to manually add a new profile.
---|---
Edit | Edit an existing profile.
Remove | Remove an existing (selected) profile.
Duplicate | Activate (connect to) an existing profile.
Apply | Save any changes.

**ADD**

When you select “ADD”, a new window will open. Enter a profile name and SSID, along with security information, and then click “OK”.

*You can also add a new profile from the “Available Network” screen.*

**VII-3-3. Available Network**

The “Available Network” screen displays a list of all available Wi-Fi networks within range along with various categories of information about each network.
Refresh the list of available wireless networks.

Connect to a selected wireless network.

Use a selected wireless network to create a new profile (see VII-3-2. Profile).

VII-3-4. WPS

The WPS page displays information relating to Wireless Protected Setup (WPS). All available access points along with their respective BSSID, security information and channel numbers are listed.
The adapter’s WPS PIN code is displayed next to “PIN:”. The PIN code is a security feature and you will need to enter it into your access point/router’s WPS configuration screen to complete PIN code WPS.

<table>
<thead>
<tr>
<th>Scan</th>
<th>Refresh the list of available wireless networks.</th>
</tr>
</thead>
<tbody>
<tr>
<td>PIN</td>
<td>Activate PIN code WPS on the wireless extender for two minutes.</td>
</tr>
<tr>

<td>Activate Push Button Configuration (PBC) WPS on the wireless extender for two minutes.</td>
</tr>
</tbody>
</table>

⚠️ **Activate WPS on your access point/router (and enter the PIN code if required) within two minutes of activating WPS on the wireless extender.**

**VII-3-5. Information**

The “Information” screen displays various information such as wireless utility version and driver version.
VII-4. WPS Setup

If your wireless router/access point supports Wi-Fi Protected Setup (WPS) then you can use this method to connect to a Wi-Fi network.

1. Press the WPS button (often the WPS/Reset button) on your router/access point to activate WPS.

   Please check the instructions for your wireless router/access point for how long you need to hold down its WPS button to activate WPS.

2. Within two minutes, press the WPS button on the underside of the EW-7811UTC for 1 – 3 seconds to activate its WPS.

3. The devices will establish a connection.

I. Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio technician for help.

FCC Caution
This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the authority to operate equipment.

Federal Communications Commission (FCC) Radiation Exposure Statement
This equipment complies with FCC radiation exposure set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 2.5cm (1 inch) during normal operation.

Federal Communications Commission (FCC) RF Exposure Requirements
This EUT is compliance with SAR for general population/uncontrolled exposure limits in ANSI/IEEE C95.1-1999 and had been tested in accordance with the measurement methods and procedures specified in OET Bulletin 65 Supplement C. The equipment version marketed in US is restricted to usage of the channels 1-11 only. This equipment is restricted to indoor use when operated in the 5.15 to 5.25 GHz frequency range.

II. R&TTE Compliance Statement

Safety
This equipment is designed with the utmost care for the safety of those who install and use it. However, special attention must be paid to the dangers of electric shock and static electricity when working with electrical equipment. All guidelines of this and of the computer manufacture must therefore be allowed at all times to ensure the safe use of the equipment.

EU Countries Intended for Use
The ETSI version of this device is intended for home and office use in Austria, Belgium, Bulgaria, Cyprus, Czech, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Turkey, and United Kingdom. The ETSI version of this device is also authorized for use in EFTA member states: Iceland, Liechtenstein, Norway, and Switzerland.

EU Countries Not Intended for Use
None
EU Declaration of Conformity

English: This equipment is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC, 2009/125/EC.

Français: Cet équipement est conforme aux exigences essentielles et autres dispositions de la directive 1999/5/CE, 2009/125/CE.

Čeština: Toto zařízení je v souladu se základními požadavky a ostatními příslušnými ustanoveními směrnic 1999/5/ES, 2009/125/ES.

Polski: Urządzenie jest zgodne z ogólnymi wymaganiami oraz szczególnymi warunkami określonymi Dyrektywą UE 1999/5/EC, 2009/125/EC.

Русский: Это оборудование соответствует основным требованиям и положениям Директивы 1999/5/EC, 2009/125/EC.

Українська: Обладнання відповідає вимогам і умовам директиви 1999/5/EC, 2009/125/EC.

Slovenčina: Toto zariadenie splňa základné požiadavky a ďalšie príslušné ustanovenia smernic 1999/5/ES, 2009/125/ES.

Deutsch: Dieses Gerät erfüllt die Voraussetzungen gemäß den Richtlinien 1999/5/EC, 2009/125/EC.

Español: El presente equipo cumple los requisitos esenciales de la Directiva 1999/5/EC, 2009/125/EC.

Italiano: Questo apparecchio è conforme ai requisiti essenziali e alle altre disposizioni applicabili della Direttiva 1999/5/CE, 2009/125/CE.

Nederlands: Dit apparaat voldoet aan de essentiële eisen en andere van toepassing zijnde bepalingen van richtlijn 1999/5/EC, 2009/125/EC.

Português: Este equipamento cumpre os requisitos essenciais da Directiva 1999/5/EC, 2009/125/EC.

Norsk: Dette utstyret er i samsvar med de viktigste kravene og andre relevante regler i Direktiv 1999/5/EC, 2009/125/EC.

Svenska: Denna utrustning är i överensstämmelse med de väsentliga kraven och övriga relevanta bestämmelser i direktiv 1999/5/EG, 2009/125/EG.

Dansk: Dette udstyr er i overensstemmelse med de væsentligste krav og andre relevante forordninger i direktiv 1999/5/EC, 2009/125/EC.

-----------------------------------------------------------------------------------------------------------------------

WEEE Directive & Product Disposal

At the end of its serviceable life, this product should not be treated as household or general waste. It should be handed over to the applicable collection point for the recycling of electrical and electronic equipment, or returned to the supplier for disposal.
Declaration of Conformity

We, Edimax Technology Co., Ltd., declare under our sole responsibility, that the equipment described below complies with the requirements of the European R&TTE directives.

Equipment: AC600 Wireless Dual-Band USB Adapter  
Model No.: EW-7811UTC

The following European standards for essential requirements have been followed:

**Directives 1999/5/EC**

- Spectrum: ETSI EN 300 328 V1.7.1 (2006-10); ETSI EN 301 893 V1.6.1 (2011-11)
- EMC: EN 301 489-1 V1.9.2 (2011-00); EN 301 489-17 V2.2.1 (2012-09)

**Recommendation 99/519/EC**

- EMF: EN 62311(2008-11)

**Directives 2006/95/EC**
