IMPORTANT SAFETY INFORMATION

In order to ensure the safe operation of the device and its users, please read and act in accordance with the following safety instructions:

WARNING: There is risk of fire or electric shock if the device is used inappropriately.

If you experience problems with the device, please contact your dealer of purchase for help. Accidental damage will void the warranty of the device.

1. The device must be used within its published power outlet rating.
2. The device is recommended for **indoor use** in a dry location only.
3. Do not place the device near steam releasing devices or heat sources.
4. Avoid exposure of the device to external heat sources, sunlight, dust, corrosive chemicals, steam, liquids and moisture.
5. Handle the device with care. Do not drop the device or subject the device to unnecessary physical shock.
6. There are no user-serviceable parts inside the device. If you experience problems with the device, do not attempt to service the device yourself.
7. Unplug the device during extended periods of inactivity and during lightning storms.
8. Do not use the device to operate or control heat-emitting devices unattended.
9. The power socket/outlet should be easily accessible and located near to the device intended for use with the product.
10. Do not stack multiple devices on the product.

I Introduction

SP-1101W / SP-2101W is Wi-Fi smart plugs that are mostly managed by a powerful application tool from Edimax Technology. Once the smart plug is connected to the internet, the accompanying app can turn on/off the smart plug remotely.

This quick installation guide will guide you through the steps required to setup the smart plug with the EdiLife app.

II Smart Plug Setup

II-1 Package Contents

SP-1101W / SP-2101W

Quick Installation Guide

CD with User Manual

Front Panel

- 1. Switch Status Button & LED**
- 2. Reset Button**

- 3. Power LED**
- 4. Network LED**

II-2 Hardware Installation

Follow the instructions below to ensure your smart plug is properly connected and ready for setup.

Please only set up one smart plug at a time.

1. Plug the smart plug into a power socket.

2. Press and hold the **reset button** (for ~10 seconds) on the plug until the network LED starts flashing **quickly** in **red** and let go.

3. Wait a few moments for the smart plug to start up. The smart plug is ready for setup when the network LED is flashing **slowly** in **red** to indicate *installation mode*.

4. When smart plug is in installation mode, please continue to **III EdiLife App Setup** to set up your smart plug using the free EdiLife app.

III EdiLife App Setup

To allow remote access to your smart plug, please use the EdiLife app.

After setup, you can use the EdiLife app to switch your smart plug on/off remotely from any compatible mobile device with an Internet connection.

Please go to the setup instructions suitable for your mobile device (iOS or Android OS).

III-1 Apple iOS

For EdiLife app to control the Smart Plug, it must be connected to a Wi-Fi network with **internet connectivity**. To do so, follow the steps below:

*If you have not reset your smart plug, please do that now! Press and hold the **Reset Button** (for ~10 seconds) until the network LED starts flashing **quickly in red** and let go.*

Please bring the smart plug within the Wi-Fi range of a Wi-Fi router that has internet connectivity.

1. Search and download “EdiLife” in **Apple App Store**.

2. On your iOS device, go to **Settings**.

3. Tap the “Wi-Fi” (outlined in red) option.

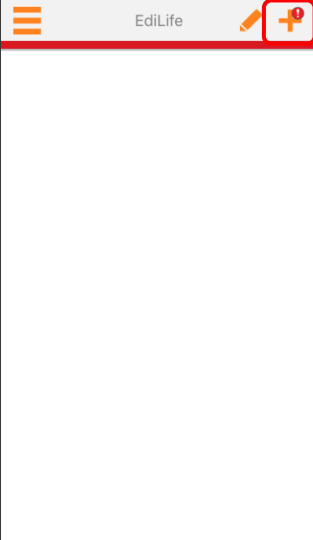

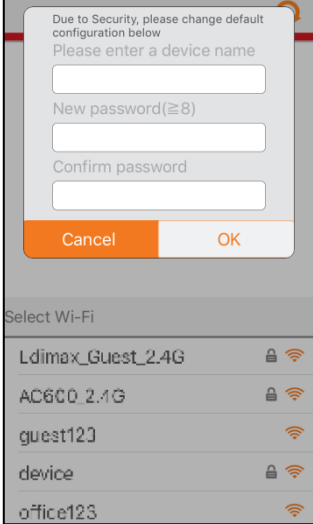

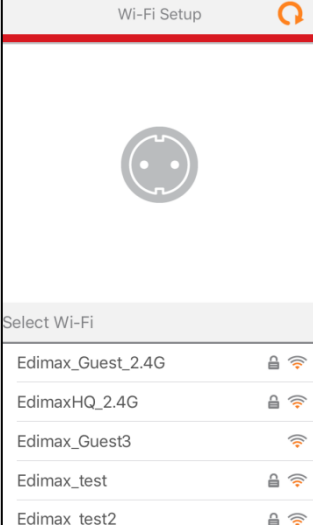

4. Find and connect to the smart plug by tapping the smart plug’s Wi-Fi name.

The smart plug’s Wi-Fi name should be in the format **EdiPlug.Setup XX** as shown on the left:

When connected, the blue tick ☒ should be shown.

*If you cannot find your smart plug, try resetting it.
See IV Resetting the Smart Plug*

 <p>The screenshot shows the main interface of the EdiLife app. At the top, there is a header bar with a hamburger menu icon on the left, the text 'EdiLife' in the center, and a red-outlined square icon with a white plus sign on the right. The main area below the header is mostly blank.</p>	<p>5. Open the EdiLife app and tap the  icon (outlined in red) on the top-right corner of the screen.</p>
 <p>This block contains two screenshots. The top screenshot is a configuration dialog box with the title 'Due to Security, please change default configuration below'. It contains three input fields: 'Please enter a device name', 'New password(≥8)', and 'Confirm password'. Below the fields are 'Cancel' and 'OK' buttons. The bottom screenshot shows a 'Select Wi-Fi' screen with a list of available networks: 'Ldimax_Guest_2.4G', 'AC660_2.4G', 'guest123', 'device', and 'office123'. Each network name is followed by a lock icon and a Wi-Fi signal icon.</p>	<p>6. Enter a device name, password and confirm the password.</p> <p>For device name, enter a name where you will likely use the smart plug for. For example, office desktop light, bedside lamp, etc.</p> <p>You can always come back to change its name later! Please refer to the user manual.</p>
 <p>The screenshot shows the 'Wi-Fi Setup' screen. At the top, it has the title 'Wi-Fi Setup' and a circular refresh icon. In the center of the screen is a large, light gray circular icon representing a smart plug. Below this, there is a 'Select Wi-Fi' section with a list of networks: 'Edimax_Guest_2.4G', 'EdimaxHQ_2.4G', 'Edimax_Guest3', 'Edimax_test', and 'Edimax_test2'. Each network name is followed by a lock icon and a Wi-Fi signal icon.</p>	<p>7. Select a Wi-Fi network (e.g. your home's Wi-Fi router) from the Wi-Fi list.</p>

8. Enter the network's password and press "OK" to continue.

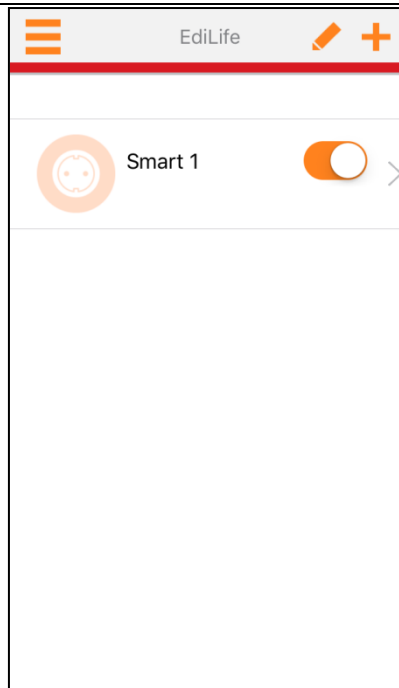

The app will connect the smart plug to the Wi-Fi router, please wait patiently.

9. Congratulations! The smart plug is ready to be used.

The smart plug's network LED should be on in **green** color to indicate a successful network and cloud connection.

You can now control your smart plug from the EdiLife home screen. Tap the switch to switch your smart plug (and any electrical device you plug into it) **on** or **off**.

III-2 Android OS

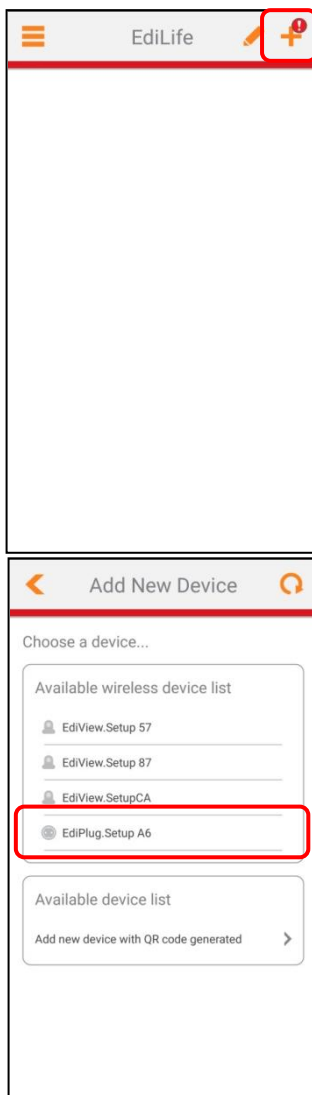

For the EdiLife app to control the Smart Plug, the smart plug must be connected to a Wi-Fi network with **internet connectivity**. To do so, follow the steps below:

*If you have not reset your smart plug, please do that now! Press and hold the **Reset Button** (for ~10 seconds) until the network LED starts flashing **quickly in red** and let go.*

Please bring the smart plug within the Wi-Fi range of a Wi-Fi router that has internet connectivity.

1. Search and download “EdiLife” in **Google Play**.
2. Open the EdiLife app.

3. Tap the  icon (outlined in red) to go to **Add New Device** page.

4. Find and connect to the smart plug by tapping the smart plug’s Wi-Fi name.

*If you cannot find your smart plug, try resetting it.
See **IV Resetting the Smart Plug***

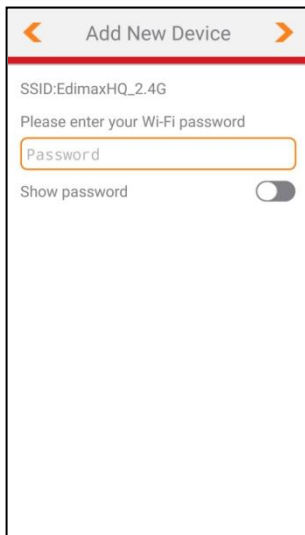

A message will be shown indicating that it is connecting to the smart plug.

5. Enter a device name, password and confirm the password.

For device name, enter a name where you will likely use the smart plug for. For example, office desktop light, bedside lamp, etc.

You can always come back to change its name later! Please refer to the user manual.

6. A Wi-Fi list will be displayed. Select a Wi-Fi network (e.g. your home's Wi-Fi router) from the Wi-Fi list.

7. Enter the network's password and press the  icon to continue.

The app will connect the smart plug to the Wi-Fi router, please wait patiently.

8. Congratulations! The smart plug is ready to be used.

The smart plug's network LED should be on in **green** color to indicate a successful network and cloud connection.

You can now control your smart plug from the EdiLife home screen. Tap the switch to switch your smart plug (and any electrical device you plug into it) **on** or **off**.

IV *Resetting the Smart Plug*

If you experience problems with your smart plug, or you want to connect the smart plug to a different Edimax app account, you can reset the plug back to its factory default settings. This resets **all** settings back to the default settings.

- 1.** Press and hold the reset button found on the front of the plug.
- 2.** Release the button (after ~10 seconds) when the network LED is **flashing quickly in red**.
- 3.** Wait for the smart plug to restart. The plug is ready when the network LED is **flashing slowly in red** (installation mode).
